DROOMS FEATURES
Group Visibility

Boost your team's collaboration with our group visibility feature, which lets administrators share previously restricted information with all group members. Administrators can control visibility settings for each group, while the administrator group always has full access for easy management. The advantages are:

> **Upload visibility:** See all group members and track who uploaded which documents, increasing accountability.

> **Shared insights:** Share notes, highlights, and findings with everyone in the group.

Activating *"group visibility"* helps your team stay aligned and work towards shared goals with complete transparency.

Our platform offers a suite of powerful tools for every transaction need. Explore the possibilities at **www.drooms.com** or contact us via **contact@drooms.com** to find the perfect solution tailored to your business.

Available in our iOS app
